Slide 8: BA English Programme Outcome

P01: Introduction to Literature: Students will be introduced to a wide variety of literatures written in English and/or available in English translation through the BA Programme.

P02: Critical Thinking: Students will develop proficiency in critical and analytical thinking through their coursework, as the pedagogy of the department aims to foster these skills among students.

P03: Reading-Writing skills: Students will achieve reading, writing, and comprehensive techniques, along with effective communication skills through group exercises, discussions, and case studies.

P05: Editorial and Publishing skills: Students will learn intricacies of editing, formatting, and producing various forms of written content. They will gain insights into the evolving technologies in the fields of publishing, journalism, and digital media.

P06: Higher Studies: Students will be equipped to pursue specialized areas of study in higher education, and they will have the confidence to engage in advanced research and contribute meaningfully to their academic disciplines.

P07: Civic Engagement and Ecological Stewardship: Through literary and linguistic praxis, students will cultivate a profound understanding of democratic principles, while actively contributing to the nation-building efforts, alongside fostering environmental awareness, commitment to sustainable practices, and ecological stewardship.

Slide 9: MA English Program Outcome

P01: Critical Thinking: Students will learn critical thinking to have a nuanced understanding of social situations.

P02: Technological Skills: Students will gain technological skills like creating slides to present their research, and other technical audio-visual devices to make their research more impactful.

P03: Archival and Ethnographic Research: Students will learn how to engage in regular archival and ethnographic research, and collect data from libraries and data repositories.

P04: Academic Writing: Students will be able to organize and present material cogently, formulate and defend an original and logical argument, employ language effectively and purposively as well as write under time constraints.

P05: Editorial and Publishing works: Students will learn editing and publishing protocols, gain awareness of copyright issues, be cautious of ethical and professional perils of plagiarism, and understand the overall significance of academic integrity.

Programme Outcome of B. A. Honors (CBCS) in Philosophy Presidency University

The Bachelor of Arts Programme in Philosophy aims to produce graduates equipped with a diverse skill set and a deep understanding of philosophical concepts. Through rigorous coursework and critical analysis, students develop robust analytical skills and are equipped with logical reasoning, enabling them to dissect and evaluate complex arguments with precision. By engaging with various philosophical theories and perspectives, students gain a broad understanding of human thought and the world around them. This comprehensive education prepares graduates for active participation in society, fostering their ability to contribute meaningfully to public discourse and address contemporary issues. Furthermore, the programme promotes value-laden growth, instilling ethical awareness and integrity in students. Ultimately, graduates emerge with the capacity to navigate ethical dilemmas, critically engage with societal norms, and advocate for positive change, making them valuable contributors to their communities and the world at large.

Programme Outcome M.A. in Philosophy Presidency University

The Master of Arts Programme in Philosophy is designed to cultivate advanced critical analytic skills and foster a deeper understanding of diverse philosophical concepts. Through intensive study and research, students engage in rigorous examination of philosophical theories and methodologies, allowing them to explore the technicalities of debates surrounding various philosophical issues. By delving into complex philosophical inquiries, students develop the capacity to formulate original research ideas and extend the boundaries of the discipline. This orientation towards research not only enhances their academic prowess but also prepares them to contribute to the advancement of philosophical knowledge.

Moreover, the programme emphasizes the application of philosophical insights to real-world challenges, enabling the students to better engage with societal and global issues. Through ethical reflection, students cultivate a heightened awareness of ethical considerations and develop a commitment to integrity in their academic, professional, social and environmental endeavours. The students engage with the world as informed, articulate, and ethically grounded individuals capable of making meaningful contributions to the crisis of the land and addressing the complexities of global issues and impacts on the local.
